

Veer

Scripts

Scripts

*A brief survey of
exemplary penmanship*

Veer type is hand-picked, font by font, for technical sophistication and visual appeal. These scripts are no exception. The impeccable calligraphic faces from nine foundries have exquisite swashes and finely drawn strokes, which means you don't have to use your own chicken scratches for that hand-drawn feel. But this book has more than curls and frills. It also has the whimsical, the distressed, the retro-futuristic, the dark, and the wild. A wide range of classic scripts and modern interpretations to investigate.

Buying type from Veer

Choose from over 5,500 fonts from venerable foundries and newly discovered type designers. All typefaces are provided as digital files via download from the Veer web site. Complete libraries are provided on CD. Search the Veer web site for the specific font you want by name or by style, or browse Veer type by individual foundry.

We'll help you find it, then get it working. Not sure what you're looking for? Need help identifying a font? Contact us. We know our libraries inside out, and even some we don't carry. Ask us about that font 'from that movie/book/logo'. E-mail or fax us type samples. We love a challenge. Once you have the font you want, we can help you – from downloading to installing, from PostScript to OpenType, Mac or Windows.

Extend your licensing. Typefaces from Veer come with a standard end user license. To use typefaces on additional computers, or as corporate faces in larger offices, contact us. Veer has been authorized by Adobe to provide official license certificates for their typefaces in North America. Veer can also provide licensing assistance and extensions for other foundries.
